Our vast experience & knowledge makes Promaster the smart choice

Case Study

Promaster Protection was commissioned by Club Marconi to oversee the upgrade of their entire fire protection system to meet new council regulations.

The overhaul included the installation of:

- Smoke detector system
- Sprinkler System
- Emergency Lighting
- Warning speaker system
- Upgrade of fire doors
- Full compliance evaluation

Testimonials from satisfied clients

Promaster Protection commenced at Club Marconi as our Fire Contractor on 1 April, 2014. At this time the Club was under an emergency fire order which Promaster successfully and professionally liaised with NSW Fire & Rescue to resolve the issues at hand. As well as being our fire service contractor, Promaster have through their Project Manager played an important role in a number of upgrades the club has undertaken in the past 3 years. Promaster have been diligent and worked closely with the Club's builders and architects in the construction and upgrade of the Club's gaming floor, function rooms and eateries. More importantly in the past 18 months the Club has undertaken a major upgrade which has included a standing fire order and throughout this process, Promaster have been very proficient in the co-ordination of contractors and the rectification works necessary for the fire programme to be completed. The Managing Director Joe Camilleri and Project Manager Chris Dunn have been most accommodating and always ensured that the works have been undertaken in an appropriate and professional manner. The club has no hesitation in recommending Promaster Protection based on our first-hand experience.
